TOM CARPENTER

22nd June 2025

Hi all,

I am following a [great tutorial series](#) on YouTube about building a Problems&Answers application. I am using this framework to build a family library instead which will house all my family's records electronically.

I then plan on using HCL Nomad to then be able to utilise the application on the Web and via iOS. My family will be able to use it as well as they do not have a HCL Notes client.

Thank you very much to Jeff Twardowski from [U B Successful](#) for sharing your HCL Notes/Domino knowledge with everyone. You have some amazing resources on your website too.

Will keep everyone posted on how the application turns out.

Thanks,

Tom
